Blumenthal Water Line Project

October 1, 2015 Open House Discussion – Hague Town Hall, 7:00 P.M.

- Estimated date of commencement: Spring 2016
- No set cost for the project until we have all commitment waivers and deposits handed in to the office and know the total distance of the water line
- **Cost to Include:**
 - **The water line all the way to the meter on the wall in your basement**
 - **Neptune water meter**
- **You will need to supply:**
 - **Water tank (minimum 300 gallons) and float system**
 - **Pressure system**
 - **Your own plumber to install everything**
- If you are wanting water to your house, as well another building on the property (such as a barn, etc.), we would bring it to the first building, with the cost from first building to the second building being an extra cost at \$17.50/meter.
- Financing option may be available – depends on the amount of people interested
- Commitment waivers and \$500.00 refundable deposit to be handed into the office on/before November 13, 2015
- Sask Water will be contacted once we have the commitment letters in hand and know how many people are interested in hooking on to the line. They will then have to approve the number of hookups before we can go further.
- Meeting will be held after November 13, 2015 to discuss amount of commitment and what the costs will be, etc. Date and place are to be determined.
- The SRWU Board will then hire an engineer to prepare the project for tender, at which time the deposit of \$500.00 will no longer be refundable
