Re: Landfill Decommission - Historic Waste Cells – Investing in Canada Infrastructure Program ICIP Funding

The RM of Rosthern No. 403 is pleased to announce grant funding through the Investing in Canada Infrastructure Program (ICIP) Community, Culture and Recreation-type infrastructure Projects for the Landfill Decommissioning of Historic Waste Cells. The RM was awarded \$861,371 in Federal and Provincial funding to decommission historic waste cells at the RM landfill.

“Investments in green infrastructure are key to building vibrant and sustainable communities,” said the Honourable Gregor Robertson, Minister of Housing and Infrastructure and Minister responsible for Pacific Economic Development Canada. “Today’s announcement will promote long-term environmental sustainability and ensure the health and well-being of the community for decades to come.”

“Making necessary changes to the landfill infrastructure is critical to strengthening rural Saskatchewan,” Minister of Government Relations Eric Schmalz said. “By decommissioning this landfill, the community of Rosthern is helping protect the environment and improve its ability to manage waste disposal for years to come. The RM’s commitment is to be commended, and we celebrate this achievement with them.”

The ICIP Program is designed to improve access to and/or increase the quality of community, cultural and recreational infrastructure for Canadians.

For more information on this project, please call Administrator Amanda McCormick at 306-232-4393.

Thank you to the Government of Saskatchewan and the Government of Canada for approving our funding application.
